

Vacancy – Sign Technicians/Machinist

Signwaves is a leading UK sign and display equipment manufacturer based in Great Yarmouth, dedicated to developing the best team with a great working environment, strong support and opportunities to help shape our future.

We are looking to appoint new and enthusiastic **Sign Technicians** to our Production Team required to work in all production areas with full training provided from Day 1.

The opportunity may arise for the right candidate, to train as a **machine operator**, working with CNC Routers and Digital Print machines.

This is a permanent full-time position with a 39 hour contract (Monday – Friday).

We operate a shift system so applicants will need to be flexible with start and finish times. There will be a requirement from time to time to work overtime hours.

Experience with product assembly duties is desirable but not essential as we are happy to offer training to candidates with an enthusiastic 'can-do' attitude. Salary starts as minimum wage with opportunities to increase in line with skills acquired.

Benefits include a mentoring scheme, training and support from day 1, plus a generous holiday allowance and profit share scheme once qualifying period served.

If you would like to join our team, we would be delighted to hear from you!
